Project Design Phase 1 - Solution Fit

Project Title: Intelligent Vehicle Damage Assessment and

Cost Estimator for Insurance Companies

Team id: PNT2022TMID33187

1.Customer Segment(S)

Owner of the vehicle, who is above 18 age.

6. Customer constraints

Obey the traffic rules while driving.

It is no applicable for those drive the vehicle below 18.

Don't skip on maintanance.

5. Available solution

Before this application comes, customer dont know how much will he get as insurance amount. But now its easy way on this application, easily we can know the estimation of the amount.

2. Jobs-to-be -Done/Problem

First of all, we should analyse the damaged vehicle based on photograph.

9. Problem Root Cause

My friend met with an accident, this cost estimater application helped him to get the insurance as soon as possible .This incident makes me to install this application

7.Behaviour

Customer need to inform about the accident to the insurance company as soon as possible, and then send the clear image of the damaged parts of the vehicle. The application itself shows how much wil you get as insurance amount. And also a person from insurance company will come and see the vehicle. After these procedures customer will get the insurance amount, the amount is sent to service center through insurance company.

3. Triggers

Seeing their neighbour, used that application, that is useful to them and more efficient solution for their problem

4.Emotions:Before/ After

Before:

I don't know what to do at that situation, iam very streesed.

After:

After knowing about this cost estimater application, i felt reliefed, this application helped

me to know how much amount i will get for insurance.

10. Your solution

If you are working on an existing business, write down your current solution first, Fill in the canvas and check how much it fits reality.

If you are working in the new business proportion, then keep it blank until you fill in the canvas and coming up with a solution that fits with in customer limitations, solves a problem and matches customer behaviour.

8. Channels of behaviour

8.1 Online:

Send the clear image of the damaged parts of the vehicle. The application itself shows how much wil you get as insurance amount. 8.2 Offline:

Customer need to inform about the accident to the insurance company as soon as possible, a person from insurance company will come and see the vehicle. After these procedures customer will get the insurance amount, the amount is sent to service center through insurance company.
